About Me

Passionate and self-driven technology enthusiast with a deep interest in mobile and web development. Constantly exploring modern tools and frameworks to build scalable, efficient, and user-focused applications. Committed to continuous learning, growth, and excellence in software development and DevOps practices.

Skills

Jenkins & CI/CD Tools

Django framework

Framework Flutter

API integration

Ansible & Terraform

Docker & Kubernetes

PhotoShop

Certifications

Aug 2025 | KodeKloud
Docker Training Course for the Absolute Beginner

Aug 2023 | The App Brewery
The Complete 2021 Flutter Development Bootcamp with Dart

In Progress | SimpliLearn Live Course
DevOps Engineer Master's Program - IBM

Introduction to Jenkins (LFS167)
The Linux Foundation Education

languages

English : B2
French : Native

Experience

Junior Mobile developer — July-September 2023
Ebenyx Technology, Abidjan

https://ebenyx.com/

Three-month internship. I learned the Angular Framework and in support I also worked on an application with Flutter.
- web service integration and mobile app (Flutter)
- Test API with PostMan Agent

Seeds For the Future Program — September 2022
Huawei Enterprise - Ivory Coast

Seeds For Future is a training and learning program established by Technology Major Huawei.
Getting started with 5G, Maching Learning, CyberSecurity

Hackaton Freelance — February 2022
INP-HB | Ivory Coast

I had the privilege of participating in a Hackathon held at the Polytechnic Institute of Yamoussoukro, where my team and I proudly secured 4th place in the competition. Our project focused on developing an Augmented Reality (AR) solution integrated with Flutter, designed to display 3D architectural house models on flat surfaces.

Latoci Mobile developer — 2025
https://latoci.com/ - **Ivory Coast**

Designed and developed the mobile application UI/UX using Flutter, implemented webhooks to handle pay-in and payout feedbacks, and integrated real-time notifications using Firebase Cloud Messaging (FCM) and more features.

Education

MTech Computer Science and Engineering — 2025-current
Invertis University, Bareilly-India

I'm deepening my understanding of software architecture, distributed systems and emerging technologies.
This program is helping me strengthen both my research-oriented mindset and my practical engineering skills, preparing me to contribute to modern, technology-driven industries.

Btech Computer science and Engineering — 2023-2024
Ivorian Institute of Technology, Grand Bassam-Ivory Coast

Completed a comprehensive program covering software development, computer systems, and embedded technologies. Gained hands-on experience in Flutter for mobile app development, full-stack web development, and Arduino-based hardware projects. This training provided a strong foundation in problem-solving, software design, and system integration, preparing me for modern, multidisciplinary technology challenges.
